

MX-BOX is a cost-effective OCR scanning software that has everything more expensive solutions have at a reasonable price.

Key benefits include:

- Reduces data entry, speeding up processing time
- Automates the accounts payable process
- Makes accounts payable activity visible

MX-BOX is rated “essential” in reviews and gets high marks for ease of use:

- Intuitive interface
- Attractive, well designed screens
- Powerful and fast
- Has assisted auto fields
- Extracts text from PDF Files
- Uploads documents to your ERP or Workflow system

Canadian North, northern Canada's leading airline company, is using to help process, approve and schedule the 40,000 supplier invoices it receives annually at its offices in Edmonton, Calgary and Iqaluit.

“Since implementing EchoVera's e-invoicing solution we've cut our processing time in half. We're saving money with every invoice we **pay. Defenitely a huge improvement over our manual process**”

- Jeff MacPherson, Canadian North

Advanced Features

MX-BOX has a wealth of features to enhance data capture & scanning productivity. Improve every data capture need you have with the multitude of features that comprise MX-BOX.

- Advanced Document Scanning
- Flexible Document Separation •
- Zonal OCR
- Nuance OCR Plugin
- Barcode Capabilities
- Details Line
- Complex Report Dismount
- PDF Data Extraction
- HotFolders
- PDF to XML conversion
- CMIS Ready
- Database Lookup

Capture Desktop

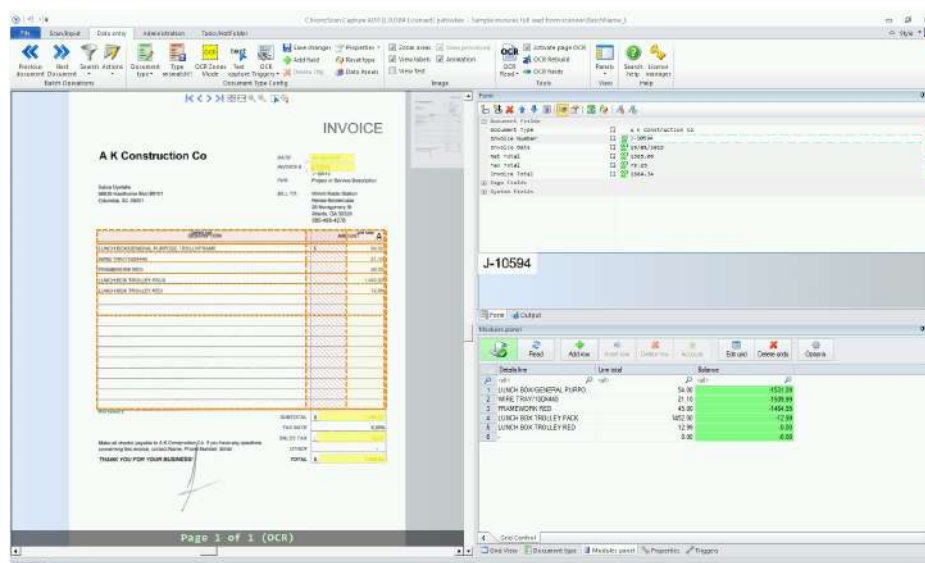

Capture Desktop is the ultimate suite for scanning, OCR and PDF data capture

Boasting a wealth of features it can provide everything from simple capture applications to the most complex and demanding line item data report dismounts.

Flexibility is the keyword regarding every aspect, from input, output and data extraction to direct database interrogation, providing live bi-directional data exchange and validation.

It Supports direct scanning as well, multiple document import streams and automated import queues via the built in hotfolder mechanism, ideal for multifunction devices and email integration.

When it comes to exporting data, it supports multiple file and data output formats, built in integrations such as Microsoft SharPoint, CMIS and GoogleDocs as well as direct database integration.

In addition you can mix and match these too!

Need even more flexibility? No problem, utilise MX-BOX built in Visual Basic Scripting support to mould the product to your exact requirements.

What are you Waiting for? Download and test drive the product now!

Features

Advanced Document Scanning

Scan and organise your documents in minutes, not hours.

Zonal OCR

Allows you to extract localised areas on your documents indicating data type and custom OCR parameters.

IntelliTag Auto Templating

Use it to automatically locate and extract data from your documents without the need to manually zone areas.

Complex report Dismount

With its' very unique features, you are able to visually dismount and structure complex documents.

Barcode Capabilities

Instantly read 1D/2D barcodes from your documents.

Complex report Dismount

Automatically execute your jobs using hotfolders without command line or scripting.

Barcode Capabilities

Activate actions such as document splits, OCR zone anchoring and document type changes when specific text is located.

Flexible Document Separation

Multiple multipage document separation strategies, IDR, OCR triggers, patchode, barcode, visual split...

PDF data Extration & Bookmarking

Automate repetitive tasks like PDF data Extraction, renaming and bookmarking.

Input/Output

Input documents from multiple streams and sources and export data and documents simultaneously to systems CMIS M-Files & SharePoint

PDF to XML/CSV Conversion

Convert documents to XML/CSV files without any user intervention. optimise business processes by automating any kind of workflow.

Nuance OCR Plugin

The worlds most accurate and robust OCR.

Database Integration

Directly validate and perform bi-directional data exchange with any ODBC database.

Intelligent Document Recognition

State of the art computer vision algorithms to detect, learn and classify both pages and documents.
